Anti-Trust Main Trunk Pipe Line:

To Navigation Sure of Completion

PLACROJA:

miles already delivered and completed and pumping oil and paid for. Only 110 miles yet to secure to finish the job. When completed will be longest independent Interstate Dipe line in the world. Will only take a short time to build the small balance yet to construct, and when completed will mean 80 cents per share for this dividend paying stock now offered to you at sacrifice prices in order to complete this pipe line without further delay. you simply cannot turn down an investment in this stock if you will give honest credit for true merit and tangible assets and dividend earning power back of this stock. On a conbasis sales of manufactured oil will total over one-quarter million dollars during the next eight months. Dividends guaranteed on this stock will pay 12 per cens, to start with on the investment at present prices. Over nine thousand loyal stockholders, representing every state and territory in the Union, besides Canada and foreign lands.

PIGHT at one million dollars cash presents the only formidable foe in actual, practical competition of the criminal oil trust in the Central West. With the effective guns of the federal government and thousands of other avenging influences closing in on the great criminal trust, an investor who does not see what a great opportunity this Uncle Sam giant independent organization has is certainly dull of comprehension. When completed, Uncle Sam anti-trust pure Missouri Valley Oil wagons will be patrolling seven states with 204 main distributing stations completed, from which we can reach six thousand smaller trade centers. At least two hundred more oil wells will be completed on the thousands of acres of Uncle Sam oil rights. Two great refineries built and in operation. Third refinery will be completed and in operation this month. Paraffine and lubricating plants being built. Twenty-five main distributing stations now completed. Nine carloads of tanks will be shipped to that many more by the time you see this announcement.

DIVIDEND NO. 2

Books Will Close Dec. 20

service. Deal pending for 26 more. Company paying as it goes. Will accept \$150,000.00 at this sacrifice price. Which, judging from past remittances, should be raised in 20 days. Now or never if you ever expect to help out this worthy enterprise in its fight for a square deal in the oil fields. Stock will be nearly doubled in price as quick as required amount is subscribed and up to 80 cents, with pipe to river refinery screwed together. We solicit your investment in good faith, but you should remit promptly, for this stock is valuable and we will not let any grass grow under our feet until every dollar needed is raised and the great plant completed, just as promised at the beginning.

First Oil Pumped Over Pipe Line Kas. This refinery Means 80 Cent Stock.

less than four months you can depend on Uncle Sam pumping oil clear through from the big oil wells near Bartlesville, Okla., to the river refinery, Uncle Sam No. 2, at to the river refinery, Uncle Sam No. 2, at Atchison. Any investor who can see as far as the end of his nose knows that the day this long stretch of pipe line is completed and the great pumps commence delivering steady streams of oil to the storage tanks at this big refinery on the bank of navigation that Uncle Sam stock will jump in the open market close to \$1.00 per share. With 151 miles of pipe delivered, paid for and completed, there is not a single doubt but what the company with all its vast strength will secure and complete in a very short time the small balance yet to construct. Investment of nearly every kind are extremely high in the United States, especially real estate. Now oil is a necessity. People must have it to read by and keep warm. There are no chances to be run in an investment in Uncle Sam stock. Just a question of a few fronths and you will be unable to buy it at all. Common sense tells you that with the completion of this pipe line it will be worth from three to five times the present selling price, while it is a splendid good investment even when it doubles in value. You cannot find another investment that will beat it. Better get in line to-day by sending in \$1,400 and securing 10,000 shares which in four months' time with pipe line to navigation will be worth at least \$5,000 to you and pay you immense dividends semi-annually. There are scores of stockholders who have invested over \$1,400 each and several as high as \$5,000. Any investor who can see as far

Oil Sales Will Total Over \$250,000.

Cil Sales Will Total Over \$250,000.

Every day this company is increasing in capacity to handle larger orders. Just a question of a few weeks until the average daily sales of oil will be better than \$1,000 per day, and on a conservative basis the sales of the eight months commencing December 1 will not miss one-quarter of a million dollars much. You are not buying hot air or blue sky. When you secure Uncle Sam stock you are lining, up with the biggest and most popular legitimate money making enterprise in the Central West. Better sell that high priced piece of real estate or call in that low interest loan or put that idle money you have in this great independent company, and help out a worthy cause and help yourself very materially while you can at a price you know is right. This company owns or controls oil rights in thousands of acres which are almost sure to develop to be worth millions. The stock is certain to go to at least so cents, with chances good to reach a dollar per share.

That the Western oil fields are rich you can see ample evidence by a few days' ride through the oil fields. Uncle Sam Company has already secured some of the greatest producers in the Kansas-Territory oil fields and will secure more.

Will Drill at Least 200 More Oil

olic when you have refineries, pipe lines and distributing stations, and a market to secure what the oil is really worth. No trust or combine can deprive the stockholders of Uncle Sam of their just dues. We are dealing with the general public, who are a thousand times more friendly to our success. The company has endeavored to make friends from the word go, and is still doing its level best to give everyone a "square deal," and to secure more friends. In so doing it is piling up an asset the value of which is hard to estimate, for you cannot buy true friends with money, and through the many thousands of stockholders of Uncle Sam it means from ten to twenty personal friends standing by each stockholder, and means a fine market and fair play for Uncle Sam anti-trust oil wagons whenever they may seek to deliver oil. With the river pipe line completed and with even four drills developing the company's oil rights, how long will it take it to double again the value of this stock? Suppose you only buy 1,000 shares at \$150; it will be a good saving for you and pay you big interest to start with, and the chances are that this very thousand shares will be worth \$1,000 to you in a few years.

Saving of Half Dollar Per Barrel.

You may not realize the great value of completing the river pipe line, but it means a saving of a half dollar per barrel on every barrel of oil pumped over this line. There is no gamble, no guess, no risk about this kind of development. Uncle Sam has a great refinery on the banks of nav.

is now in operation and can handle 800 barrels of oil every day and is thorough and and is thorough and is thorough and is thorough and up to date. In the remonths' time this company can double this refinery No. 2 capacity, or make if 1,200 barrels per day with but little cost, as it was built with that intention. Now, don't wait until the lar-

Company Has Overcome Oil Trust Conspiracy, Ridicule and Abuse.

Conspiracy, Ridicule and Abuse.

The Uncle Sam Company is compelling the respect and consideration of people today who would not look at it on the start. Others were misled by would-be financial papers and a few boodle newspaper conspirators by their attacks against this company, and a few perjured hirelings writing for a few magazines and certain newspapers which wear the oil trust railroad collars, but their rantings have only helped this company and caused its friends to rally more to Uncle Sam's support, until to day there are over ten thousand stockholders backing this company, and until over \$950,000 cash is now back of Uncle Sam, while over \$50,000 more is subscribed on gilt-edged installment contracts. Now, this kind of a lineup is certainly worthy your consideration. For no man with any sense at all can consistently say that such a showing is not a strong one—one that no other enterprise can cite you to, considering the rocky road traveled. On the other hand, we can tell you that there is not a single doubt but that every dollar of the \$150,000 that will be accepted at this sacrifice price will be quickly raised. After nearly two years, working nearly night and day to put this proposition through as promised at the beginning, overcoming ridicule and abuse and suffering injustice from blackmailers and trust hirellings, we know that it will be easy work to complete everything now, and if you fail to take advantage of the sacrifice price offered the public in this announcement you will hurt your own pocketbook more than anything else. However, we will be glad to have you join our loyal band, and whether you live in California or New York, or whether you invest \$15 for 100 shares or \$2,750 for thirty thousand shares, your interest will be faithfully furthered and dividends sent you semi-annually.

Every share holder of record or who has mailed a remittance for stock before the day closes Thursday, December 20, will participate in dividend No. 2. Books will be closed for dividend No. 2 on that day. Now some wiseacre and knocker and oil trust hireling will say that this dividend is not honestly earned but it will be just the same and you can get it if you act promptly, but you won't if you don't. Furthermore, you will see the state of the control of the control

12 Per Cent. and No Taxes.

The dividends already guaranteed on the stock will pay you better than 12 per cent, on the investment. When you stop to consider that you have no taxes it means a whole lot. The facts are that when it comes right down to brass tacks the stock is a gilt-edge investment and a sacrifice price in fact as well as name. You can't beat it and we know it. Look at the investments that are not as name. You can't beat it and we know it. Look at the investments that are not backed with as strong assets that are only bringing 3 and 4 per cent. Just gra

present investment and continue to increase the diviright down and figure it out yourself, and we don't care whether you are farmer, merchant, laborer or banker, it won't hurt you can any to take a block of this stock. You can make no better investment than to at least divide up your investments. This company now has enough men and money back of it to insure a continued growth and greater dividends, and at the same time give the public a square deal.

Oil Trust Threatened to Leave Kansas in Darkness.

Two years ago there was not a single independent oil wagon delivering oil in Kansas.

Two years ago there was not a single independent oil wagon delivering oil in Kansas.

In fact, the criminal trust had such a grasp on both producer and consumer that it bear the state in the state of 1905. Of course Kansas called the bluff of these criminal promoters and producer and consumer that it does not be the state in the sum on these brigands and millionaire anarchists in the Legislature of 1905. Of course Kansas counteres when Kansas commenced the fight on these brigands and millionaire anarchists in the Legislature of 1905. Of course Kansas and passed conservative protection laws so that any enterprise Jocating in Kansas would get a square deal, and by so doing has been the oals of millions of dollars of capital coming to Kansas. Strange as it may seem, the oil trust has met serious trouble ever since it threatened the Jayhawkers, and with Uncle Sam stations now completed in over a score of the richest and largest counties in Kansas and sites purchased, deals and stockholders in these seven States represented on the map here with the sunformer that it is from the legit on the state in grand the flight on these from which when completed with the fight on these from which when completed with the sight on these from which when completed by the producer anarchists in the Legislature of 1905. Of c

FROZEN TO DEATH.

Verdict in the Case of a Man Found Dead at Sandy Hook.

SANDY HOOK, N. J., Dec. 4.-George

body was found.

Last night's cold, increased by a piercing northwest gale, must have chilled him to the marrow and his sleep ended in death. The inquest verdict was that he was frozen to death. He was about 36 years old. He or boatman for some shipping firms. For the last six months he has been visiting his brother, William Young, at Sandy Hook, taking an occasional trip to New another year this old arrogant bully trust which has made its brags that it has corrupted judges, bought elections and bribed legislatures will find that it's up against the real thing in Kansas and the Central West, for there is one good way to fight a trust and that is to refuse to buy their goods. Consumers in Western and Central Kansas who under oil trust manipulations for the past ten years have been forced to pay from 38 to \$11 per barrel for oil can now secure superior Uncle Sam oil at from \$4.25 to \$4.50 per barrel, and at this rate Uncle Sam can pay increased dividends and put our stock to par. Pushing Fuel Oil. Uncle Sam has both fuel oil and kero-sene successful burners and is pushing both with splendid results. When you buy this stock you are placing your investment where it is backed by certain revenue getters.

Big Deals Pending.

There are over fifty deals now pending on this stock that average over one thousand dollars each. Heavy sales are being closed continually. A man from Canada put in \$1,250 last week. Two one thousand dollar remittances came in from Mussachusetts, while one deal for \$2,400 was closed in Nebraska and one in Missouri for \$3,000 during the past ten days. We could cite you to a hundred large transactions, so don't deceive yourself with the idea that you can wait long and get this stock, for men who know its value are buying heavily.

\$2,000,000 a Year.

With everything completed Uncle Sam Company will be able to make close to two million dollars per year. That's why this stock will go to par, and that's why you ought to buy it. Furthermore, this estimate of two million dollars profit yearly after completion is based on obeying the laws of the land and not making perjurers and criminals out of our employes.

Why the Stock Will Be Sold.

delay too long you will be too late to get in at this price, for telegrams will be pouring in for this stock while you are hesitating what to do. It's no trouble to sell stock in a good company like Uncle Sam, for people are glad to invest in such an enterprise; so you should remit promptly, to secure present offer.

In Conclusion.

In Conclusion.

Uncle Sam Company has in addition to the two big refineries in Kansas another effinery, No. 3, partly built, in the heart of he Oklahoma oil field at Tulsa, Okla. The effnery will start this month. It is also building a paraffine plant at Atchison by the refinery No. 2 and a lubricating plant at Tulsa by refinery No. 3. The company already has sites purchased in the majority of the Oklahoma trade centers and Uncle Sam representatives will start to secure sites for Iowa distributing stations next week. Council Bluffs and Omaha sites are already secured. The company, as before stated, is on a solid foundation with everything practically paid for and thousands of dollars cash on hands. Authorized capitalization is seventeen million shares, par value \$1.00 per share, sixty per cent. of the stock is sold. Every share draws the same amount of dividend as any other share.

There is about \$50,000 subscribed on stock already allotted from the treasury. The balance of the stock when sold will bring the company close to \$1,000,000. The company will do everything that is mapped out in enclosed map. With everything completed it will have strength and funds

enough to force the criminal trust to be decouse or drive it from the Central West, and this is no idle statement. The Uncle Sam Company was forced into existence when the criminal trust issued their famous boycott order against the Kansas oil fields. The men back of it were oil producers in good faith, but Kansans who would notsit idly by and see the millionaire hog confiscate their properties. They are building solidly in Kansas, which is their home. Kansans gamely stand by one another, especially against a foreign thieving combine. It is now preparing to carry the fight into adjoining states and the stockholders in the meantime will soon commence an organized effort to petition congress for a law similar to the Kansas anti-discrimination law. This organization, outside of the government, is doing more to buck the monopelistic grip of the criminal trust than any other, hundred influences combined. It is a struggle for right, in good faith to the finish, with no compromise. Right always has and always will win. We solicit you in good faith to join our band and help push the good work along you can buy stock at the following prices, or write or wire for more complete particulars.

RULE OF THUMB, RULE OF LOSS

26 YEARS OF RULE OF SCIENCE IN METAL CUTTING.

Mechanics Taught to Double Output of Machines and Extraordinary Wages Paid for Doing It -Secret Formulas Intrusted to Many and Never Betrayed.

At the opening session last evening of the twenty-seventh annual convention of the American Society of Mechanical Engineers, at 44 West Twenty-seventh street. the retiring president, Frederick W. Taylor, formerly of the Midvale Steel Works, read a paper on "The Art of Cutting Metals, in which he made the declaration that under the old "rule of thumb" method of work. in nearly all departments of skilled labor, the mechanic seldom does more than onethird of what he could do scientifically.

Mr. Taylor said that he and those associated with him in the work of increasing the productive ability of the workman had spent twenty-six years developing shop practice into an exact science. They cut up about 800,000 pounds of steel in making about 50,000 experiments costing \$200,000, discovered certain laws covering the art of cutting metal and obtained mathematical formulæ expressing the laws. Finally they developed a slide rule by which the ordinary mechanic can double the output of his

Under the shop system of Mr. Taylor and his associates each workman has set for him a day in advance a definite task, with detailed written instructions, and an exact time allowance for each element of the work. Extraordinary high wages are paid to those who perform their tasks in the allotted time, and ordinary wages to ose who take more than their time al-

Mr. Taylor intimated that the study of the workman was as essential as the study of the machine. By fitting the man to the machine and the machine to the man their combined productive capacity had been vastly enlarged, and the man had received efit in very much higher wages and

"In the long period we have been engaged in this work," Mr. Taylor said, "we have never sold any information connected with it for cash, but we have given to one company after another all of the data and

conclusions arrived at through our experiments in consideration for the opportunity of still further continuing our work.

"During this period all of the companies

of these promises were verbal; and in this companies who were given this information, and all of the men who worked upon the experiments, were bound by promises to the writer not to give any of this information away nor to allow it to be published. Most of these promises were verbal; and in this day when there is so much talk about disday when there is so much talk about dis-honesty and graft in connection with some of our corporations and prominent business men, it is a notable fact that through a period of twenty-six years it has not come to our knowledge that any one of the many men or companies connected with this work has broken a promise. I have my doubts whether any other country can produce a parallel record of such widespread good faith among its engineers and mechanics." Mr. Taylor said he found out that a proper task in machine work set by a competent

task in machine work set by a competent man, after an investigation, was vastly greater than the task any man either would or could set for himself based on the know ledge he had, or could get. Similar investigations into other kinds of work, including textile and other light manufacturing, indicated that this rule was far reaching, and during twenty-six years of work under all kinds of conditions not one ex-

About 900 engineers About 900 engineers and their wives attended the meeting. Eminent French, English, German and American mechanical experts will discuss Mr. The American mechanical experts will discuss Mr. Taylor's paper at this morning's session.

STRIFE IN THE MUSICAL UNION. Four Candidates for President at the Election Soon to B e Held.

Umusual interest, it is said, is taken by the manage rs of the two opera houses and the theatres in this city and by impresarios generally in the coming annual election of officers of the Musical Mutual Protective Union, which will take place next Tues-This is on account of the stand the union took in refusing to order its members on strike in the Metropolitan Opera House on behalf of the old chorus. This action of the union is taken as an indication of its stand in future under similar conditions. The election is expected also to be unusually exciting from the fact that there are no less than four candidates for presi-

dent, and each of them has supporters.
They are Maurice F. Smith, who is running for reelection; Carl H. Hackert, Eugene A. Johnson and Frank W. McKee. Up to yeserday evening it was said that the real alght would be between Hackert and McKee.

Opens an Agency in This City to Attract

American Capital. Secretary Root's recent mission of friendship to the republics of South America has already borne fruit in the shape of a government information bureau of the Republic of Colombia, which has been opened in this city. Senor Ahrio Dias Guerra, who is the city. Senor Ahrio Dias Guerra, who is the direct representative of President Reyes, sits behind a rosewood desk in his office on the fifth floor of the Kemble Building, 15 Whitehall street, ready to tell New York capital all it wants to know about the resources and possibilities of his country. Senor Guerra has in his suite of offices a typewriter who speaks English, a dark gentleman who speaks Spanish and some

gentleman who speaks Spanish and some fine specimen cases which will soon be filled with quartz, emerald matrix, crude rubber blocks and other interesting indexes to the opportunities offered by Colombia. Barring evolutions, Señor Guerra says he is here to

"This is the first time that a South American republic has thought it necessary to open promotion offices in a foreign country," said Señor Guerra yesterday. "Colombia is glad to be in the lead of all her sisters in setting a new mark for enterprise

in this country.
"When your Secretary Root visited South America a few months ago he made a tre-mendous impression. Gen. Reyes, our President, has always been an admirer of your President—Roosevelt—and even more he became his admirer when Señor Roose-welt sent his Sacratage and he convent

he became his admirer when Señor Roosevelt sent his Secretary south to convey to all of us the message of good will from the powerful brother in the north. It gave to all of us of the south much confidence and the large trust in the United States. "Now my President is a warm friend of this country. He admired this country when he was in Washington, and he even rebuked his own country for the way it acted when the Panama republic was in dispute. Gen. Reyes has become a strong man in the republic, and he is a farseeing man. He looks ahead and sees the future good of Colombia. He will make every good of Colombia. He will make every effort to guarantee the rights of foreign capital invested in our country, because he knows that it is only through foreign capital that we can hope to be prosperous. He is not like Castro, who gets foreign capital into his country and then milks it of all its profits. Reyes knows that America is the best market for Colombian products, and he wants the miner, the manufacturer and the exporter to come down and see what

we have for sale.

"To this end he has sent me up here to answer questions and to point the way for investment in my country. And I ex

Dr. Noble Talks to the Woman's Health

Society on Consumption. Dr. Emily Noble of San Francisco, who recently appeared before the congress of tuberculosis in this city, surprised the members of the Woman's Health Protective Association yesterday afternoon by the statement that she had not used a pocket handkerchief for five years. The members looked at one another and gasped.

Dr. Noble reassured them a little when she added that she had never needed to

use one.

She shocked them again a minute later when she said: "We have in this country false ideas about breathing and we are taught erroneous systems of respiration. I venture to state that there are not 2 per cent. of adults in this country who are using one-half of their total lung power and the children in the schools are not using more than one-sixth.

than one-sixth. rhythmic breathing.

Dr. Noble's remarks followed an address by the president of the society, Mrs. Mary E. Treutman, in which she reviewed the work of the society and called upon the members to help her in the fight against the horse car service in the metropolis.

Young arrived at Sandy Hook on the quartermaster's steamer Gen. Johnston last evening from New York. He was found dead this morning. Money and valuables which he carried were still in he pockets. He arrived considerably under the influence of liquor and was helped along the wharf by friends, but left to himself he must have sat down and afterward stretched out on the partly sheltered side of the torpedo loading shed, where his

All Members Believed Negro Guilty, but

VICKSBURG

CHAPLEO MIS

NORFOLK, Va., Dec. 4 .- A hung jury resulted in the trial of John Smith, a negro, in the corporation court here to-day for criminally assaulting Mrs. Mollie Leggett in Princess Anne county two months ago. The jury was discharged early to-night. The jury was solid for conviction, but could not agree as to the penalty. The

first ballot taken by the jury stood seven for the death penalty and five for eighteen years imprisonment. At the last ballot there were nine for the death penalty and three for eighteen year s. A strong chain of circumstantial evidence was forged around Smith. Mrs. Leggett testified that the man who attacked her had two fingers missing from his right hand, and the marks left on Mrs. Leggett's neck indi-cated it. Smith had two fingers missing

from his right hand.

The case was transferred from Princess
Anne county to Norfolk to prevent a lynch-

The trial was closed to every one except the court officers and attendants and news-paper reporters. A large crowd of Princess Anne citizens had arranged to attend the trial, but learning that they would not be permitted to enter the court room did not

Social Register for 1907. The "New York Social Register" for 1907

was issued yesterday. This year St. Paul and Minneapolis have been added to the series, which now takes in practically all the large cities. In the last 676 persons named in the Register 676 persons named in the Register were married, as compared with 616 last year, and 183 women and 264 men died, as compared with 185 women and 250 men the year before. The Register gives the names of the children of families in the order of their age, those from 14 to 20 being grouped under the title of "juniors."

Columbia Takeoff on President Butler. "The Ides of March" is the title of the play which the Columbia Players will produce this year for their annual show. The play, which was written by E. Breitenfelt, '09, was selected partly because of the clever takeoff of President Butler that is introduced. Cosar, the principal character, will be made up in as exact imitation of Dr. Butler as possible and will bring the play to a grand climax by abolishing gladiatorial contests.

Votes to Return to Old Rate of Com sion and to Permit Salaries.

CHICAGO, Dec. 4.-Two important changes in trading rules were made to-day by the Board of Trade. The most important was a return to the former commission charge of 1/4 cent per bushel to non-members of the board and 1-16 cent to resident members. This cuts in half the trading price that has been in vogue for months and through which much trading was driven to other markets and to bucket shops. The vote to return to the old commission

rule stood 566 for and 277 against. Another rule was adopted providing that brokers may accept a salary instead of commission. The vote on this proposition was 445 for and 394 against.

TO SNUFF CHICAGO'S RED LIGHT. Municipal Court Judge Declares He'll

Close Houses and Expose Men Prisoners. CHICAGO, Dec. 4.-Plans to extinguish Chicago's red lights and to prosecute those who frequent evil houses regardless of their prominence or position were forecasted to-day in the action of Judge J. F.

casted to-day in the action of Judge 3. F. Going, in charge of the Desplaines street branch of the Municipal Court, when sixty frightened denizens of the West Side levee were brought before him.

The Judge gave formal warning to the women that their places would not be allowed to continue. He told them they would either have to find employment or leave the city. leave the city. Judge Going also said that he would have

every man found in a levee resort arrested. He promised that the more prominent the ner the higher would be the fine im-

TUFTS COLLEGE P. O. LOOTED. Robbers Blow Safe, but Waken None of the Students Asleep in the Building.

MEDFORD, Mass., Dec. 4.-Burglars blew open the safe in the Tufts College post office sometime last night and carried off a lot of stamps and the contents of a mali bag. They also stole some money from the safe.

The post office is in a large room on the lower floor of Curtis Hall, one of the dormitories. A number of students were asleep upstairs at the time, but none of them heard the explosion. Nothing was known of the burglary until the clerks
